

European Networking Summer School (ENSS) Plant Epigenetics 2010

September 20th to 24th 2010

**Leibniz Institute of Plant Genetics and Crop Plant Research
(IPK), Gatersleben, Germany**

Topic

The ENSS: Plant Epigenetics 2010 will offer an exiting overview of current concepts and methods in plant epigenetic research.

Renowned experts will present current concepts and results in eleven plenary lectures. In addition, participants will get the opportunity for in-depth discussion and hands-on experience in relevant methods in four lab-work afternoons.

Confirmed Speakers

Vincent Colot (France),
Ann Depicker (Belgium),
Andreas Houben, (Germany),
Michael Florian Mette (Germany),
Peter Meyer (United Kingdom),
Ortrun Mittelsten Scheid (Austria),
Gunter Reuter (Germany),
Ingo Schubert (Germany),
Patrick Schweizer (Germany),
Renate Schmidt (Germany),
Wen-Hui Shen (France)

Organizer

Michael Florian Mette,
Epigenetics Research Group
IPK Gatersleben, Germany

Application

The school targets at experienced Ph.D. candidates and early stage post-doctorial fellows from the plant field, who are interested, but not yet experienced in work related to epigenetics. Participants will be selected based on submitted abstracts. The European Science Foundation will cover full travelling and accommodation expenses for participants. Applicants from the European Union and associated countries are invited to register at the:
